Setting up Raz-Kids

Your classroom account and student roster has been created for you.
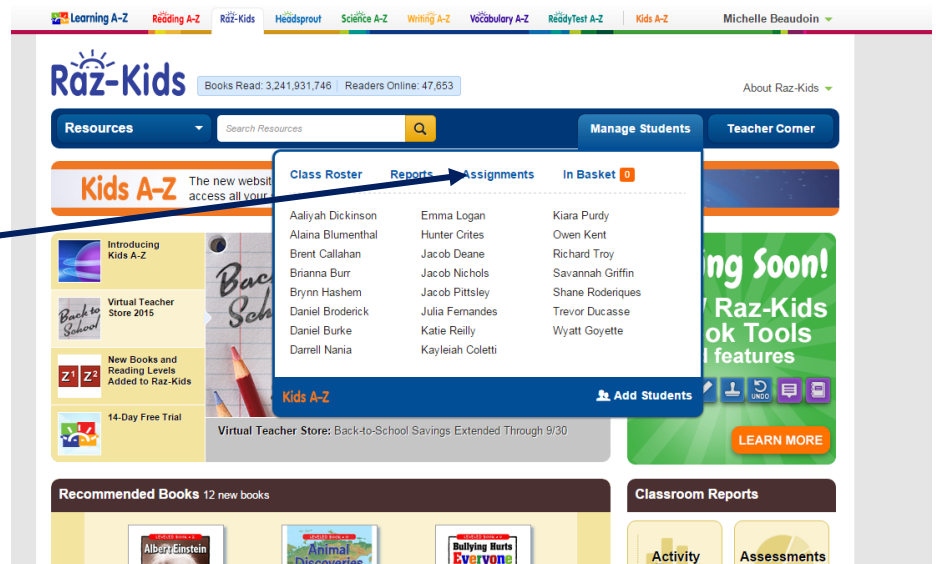

Please notify Cindy DiStefano if you notice a student is missing from your class roster, or you have a new student as she is handling student accounts. Please do not change student usernames or passwords.

First things first, log into your teacher

Click, Manage Students button at the top of the screen.

Click Assignments option in the pop-up.

Assign a Reading Level

Click the drop down arrow next to student name and select their independent reading level
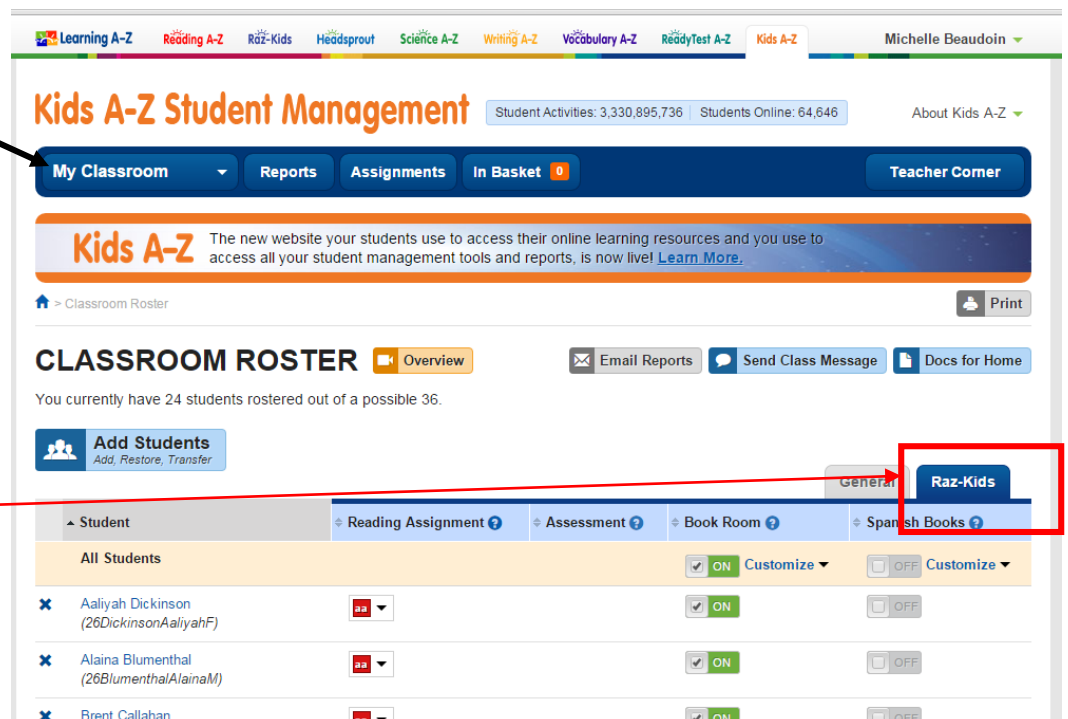

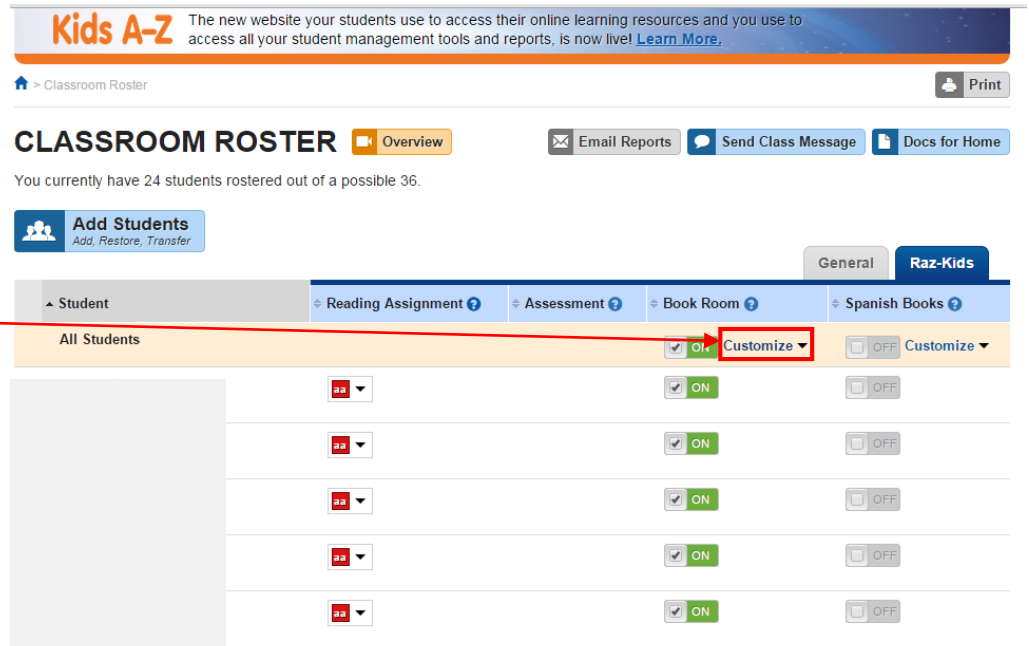

See attached reading level correlation chart

https://www.kidsa-z.com/main/ViewPage/name/help_chart/

Raz-Kids is self-advancing; as students successfully complete the books at their assigned level, it will automatically advance to the next reading level.

Click on the **My Classroom** tab at the top of the screen

Click the **Raz-Kids** tab

Created by: Louise Bertelli 2015

Click the Book Room **Customize** drop down arrow to open and set the leveled reading range

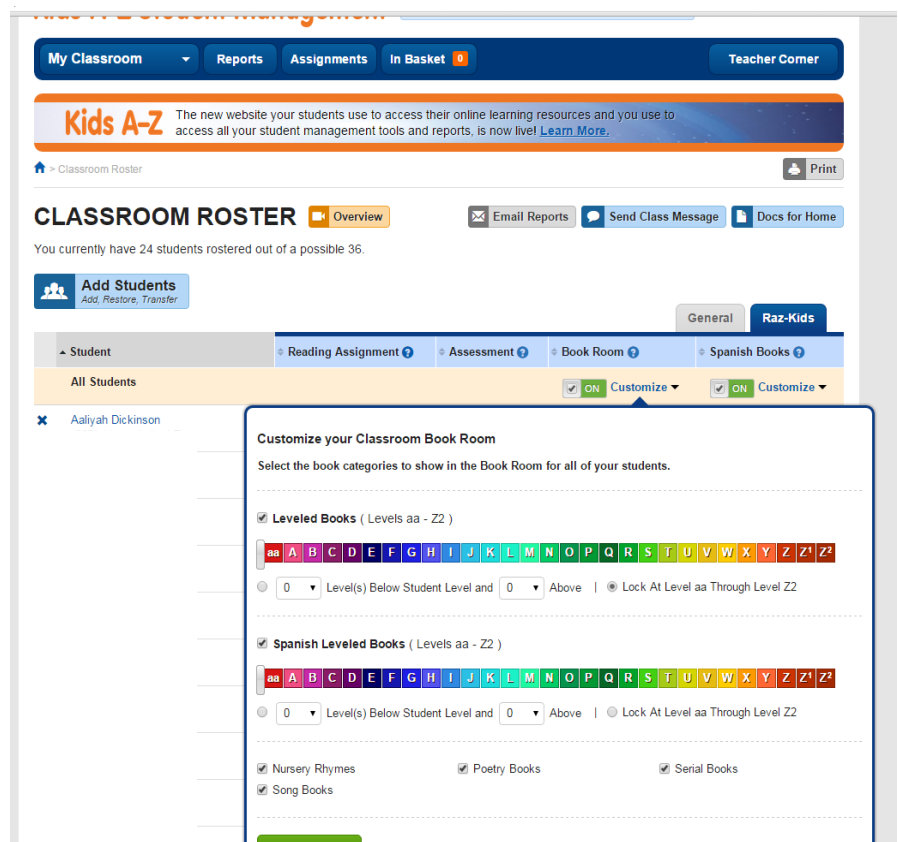

Book Room – additional books the student has access to.

Customize the level of books the student has access to in the Book Room.

You can set their access range; select the number of levels below their assigned reading level, allowing them access to lower leveled books.

Uncheck the Spanish Leveled Books, otherwise your students will be reading text in Spanish.

Press **Save**

Click the **Reports** button at the top

Reports

View Class Activity Overview to view which students have logged in and how long they were on.

Click the tab Raz-Kids for more details

About Kids A-Z | Site Map | Privacy Policy

Click on the **RazKids** tab to view details of students' activities; the title of the book they read or listened to, the quiz (and results). Click the score to view details of the quiz and the student's answers.

Created by: Louise Bertelli 2015

This screen provides insight and information of the student's responses; reading comprehension skills as well as the Common Core Standard it relates to.

Raz-Kids Recommendation:

"Independent Practice Time

You can use classroom computers or the computer lab in your school to schedule independent practice time, or have students access the Kids A-Z learning environment from any computer with an Internet connection.

Recommendations for Student Practice and Pacing:

- *Reading Solution and Raz-Kids*
  Provide independent reading practice in class for 15-20 minutes a day 3-4 times a week as a reasonable goal to set for your students. Students with Internet access outside of school should strive for even more independent reading practice. Students can practice using desktops, laptops, or our free Kids A-Z app for iOS or Android devices."
